

NOVA STEEL

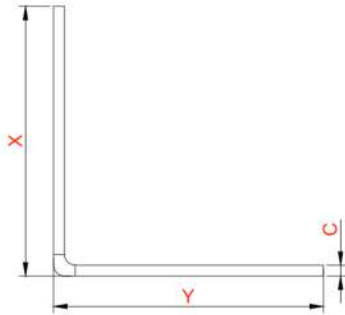

L PROFILE

L profiles, which have a very wide usage area, are used not only in the industrial sector, but also in individual uses and renovation works used in homes.

L profiles produced for different purposes are a widely used building material.

L profiles can be produced in desired size, thickness, length and density.

L profiles can be preferred in various fixing processes.

Section Names		Production Range
X	Left Edge Height	*
Y	Bottom Edge Width	*
C	Thickness	*
